

CAN bus-based I/O Module, CIO 208

Add 8 relay outputs to your genset controller

CIO 208 features

- ▶ 8 relay outputs
- ▶ 240 V AC or 30 V DC relay contacts
- ▶ 8 A relay rating
- ▶ CAN bus interface
- ▶ LED indication of status and input state
- ▶ 12/24 V DC supply

The CIO 208 is an external I/O module for DEIF's Multi-line series for those requiring a number of relay outputs exceeding the capacity of a range of DEIF genset controllers.

The CIO module requires a host controller to send and receive information.

Currently, the CIO 208 is compatible with DEIF's AGC Plant Management and AGC 200 controllers.

More controllers will be added over time – please refer to www.deif.com for an updated list.
