

Quadratic Moving Coil Instrument, DQ

Measure low power DC signals

The moving coil meters are applied to measure low power DC signals, for example 01 mA/4 to 20 mA/0 to 10 V DC etc.

DQ is available in four different sizes, in other words 48 mm, 72 mm, 96 mm and 144 mm.

DQ features

- ▶ Accuracy class: 1.5
- ▶ 90° or 240° pointer deflection
- ▶ IP52 protection (IP54 on request)
- ▶ Customised and exchangeable scale available for 90°
- ▶ Measuring range: 60 mV to 300 V, 1 mA to 40 A (except for Q48: 1 mA to 600 mA)

DQ type approval
